

# WARM-TONE DYE SOLUTION<sup>®</sup> TECHNICAL DATA

## Crystalac Finish<sup>®</sup>

**Solvent-Free**  
**Non Hazardous**  
**Non Evaporating**

<b>STANDARD PRODUCT DESCRIPTION</b>	<p>The trouble with modern clear coatings is that they look like plastic wrap on a surface. Traditional spar varnish on the other hand, has a 'warm' and natural amber tint. Unfortunately it can take a handful of coats of varnish to begin to really notice that 'warm' tint.</p> <p>"Warm Tone Dye Solution" can be added to any epoxy or solvent based clear coat to give it that warm, amber/yellow glow. Epoxies need to be topcoated with paint or varnish for UV protection. With this new product you can give your epoxy a varnish tint even before you apply the varnish. Alternately, you could 'darken' our India Spar Varnish so that it looks like 8 coats of varnish tinting with only one or two coats of varnish. Of course, you can also make your one or two part poly have that 'warm' varnish feel too.</p>
<b>FEATURES</b>	Non-Hazardous
<b>APPLICATION</b>	A starting rule of thumb is about 1 oz of product per quart of clear finish.
<b>PRECAUTIONS</b>	Keep away from children. Do not drink. Keep off skin..
<b>TRANSPORTATION</b>	Non-Regulated by DOT, IATA & IMO.

**SAFETY:** This is a hazardous material if misused. Read and understand the Material Safety Data Sheet (MSDS) before use.

**WARRANTY DISCLAIMER:** The technical data given herein has been compiled for your help and guidance and is based upon our experience and knowledge.
